THIRTIETH and THIRTY-FIRST
ANNUAL REPORTS

OF THE

Sharon Sanatorium

SHARON, MASSACHUSETTS

DECEMBER
1920 - 1921

SHARON SANATORIUM FROM THE SOUTHWEST

Thirtieth and Thirty-first
Annual Reports

of the

Sharon Sanatorium

For Pulmonary Diseases

Sharon, Mass.

December, 1920-1921

Incorporated March, 1891

Boston
Griffith-Stillings Press
1922

OBJECT OF THE SHARON SANATORIUM

TO supply a suitable institution for the treatment of *incipient* pulmonary disease arising in women and children who are unable, for pecuniary and other reasons, to seek distant health resorts. Only patients who are of limited means are received, and no far advanced cases are admitted. Price of board for women \$20 per week, exclusive of laundry. For children \$15 per week, including tuition.

The services of the Medical Director and medicines are given free of charge.

Visiting hours { from April 1 to November 1, 3 to 5 P.M.
 { from November 1 to April 1, 1 to 3 P.M.

Visitors are kindly requested to adhere to these hours.

Applications must be made to the Superintendent, Dr. Walter A. Griffin, Sharon, Mass., or to the Medical Director, Dr. Vincent Y. Bowditch, 506 Beacon Street, Boston.

*Died January, 1921 .

The Directors of the Sharon Sanatorium desire to place on record their deep sorrow and inexpressible sense of loss at the death of their President, Professor William T. Sedgwick, which occurred suddenly on January 25, 1921.

For many years he was the steadfast friend and counselor of the Sanatorium. To him the Directors owe much of the success and prestige which the Sanatorium has attained, and to them his loss is irreparable. His sterling strength and purity of character, his never failing courtesy and kindness, his calm and wise judgments, endeared him to them all, and the Sanatorium has lost a devoted worker and true friend.

Commonwealth of Massachusetts

BE It Known that whereas THE SHARON SANITARIUM, a corporation organized under the laws of this Commonwealth, and subject to the provisions of chapter one hundred and twenty-five of the Revised Laws, has complied with the provisions of chapter one hundred and nine of the Revised Laws, as appears from the certified copy of the order of the Commissioner of Corporations, authorizing said corporation to change its name and adopt the name of THE SHARON SANATORIUM and the certificate of the President, Treasurer, and Directors of said corporation, duly filed in this office pursuant to the provisions of section ten of the aforesaid chapter one hundred and nine of the Revised Laws.

NOW, THEREFORE, I, WILLIAM M. OLIN, Secretary of the Commonwealth of Massachusetts, do hereby certify that the name which said corporation shall bear is

THE SHARON SANATORIUM

which shall hereafter be its legal name.

WITNESS my official signature hereunto subscribed, and the Great Seal of the Commonwealth of Massachusetts hereunto affixed, this seventeenth day of May in the year of our Lord one thousand nine hundred and four.

[SEAL]

(Signed) WM. M. OLIN,
Secretary of the Commonwealth.

Commonwealth of Massachusetts }

My commission expires July 23, 1926.

BY-LAWS OF THE SHARON SANATORIUM

ARTICLE I.

The Corporation shall be composed of those persons signing the articles of association and of such persons as they or their successors shall elect to be members.

ARTICLE II.

The annual meeting of the Corporation shall be held on the second Wednesday of December in each year, at such time and place in the city of Boston as the President, or in default of appointment by him the Secretary, may appoint, and notice of the said meeting shall be sent to the members at least seven days before the meeting.

Special meetings of the Corporation shall be called by the President or Secretary by three days' notice in writing.

Five members shall constitute a quorum at all meetings of the Corporation.

ARTICLE III.

The officers of the Corporation shall be a President, Secretary, Treasurer, and not less than four nor more than eight directors at large, who shall serve for one year and until others shall be elected in their stead. The said officers shall constitute a Board of Directors, and shall have full power and authority to manage the affairs of the Corporation subject to such regulations and restrictions as the members at meetings of the Corporation may from time to time establish.

ARTICLE IV.

The Board of Directors shall have power to take any measures which they may deem expedient for encouraging subscriptions, donations, and bequests to the Corporation; to enter into and bind the Corporation by such compacts and engagements as they may deem advantageous; to appoint from time to time such agents or committees as they shall think proper to attend to the practical details of the working of the hospital or to oversee and superintend the same; to appoint or engage the physicians, surgeons, matrons, attendants, and servants employed in the hospital and define their duties; and this power they may delegate to any of the committees above referred to, if they shall see fit so to do.

The Board of Directors may fill all vacancies in the Board up to the limit in numbers authorized by these By-laws.

Three members shall constitute a quorum at all meetings of the Directors.

There shall be meetings of the Directors quarterly, on the second Wednesday of March, June, September, and December. Special meetings of the Directors shall be called by the Secretary.

ARTICLE V.

The President shall preside at all meetings of the Corporations and Directors. In his absence a President *pro tempore* shall be chosen.

ARTICLE VI.

The Treasurer shall receive and have the custody of all moneys, deeds, and securities of the Corporation, which he shall keep and manage under the control of the Board of Directors or any committee of the Board. He shall pay no moneys but by order of the Board of Directors or their committees.

ARTICLE VII.

The Secretary shall attend all meetings of the Corporation and Directors and keep a record of the proceedings of each meeting in a book kept for that purpose; she shall give notice of all meetings of the Corporation, as is provided in Article II, and of all meetings of the Directors.

ARTICLE VIII.

The property of this Corporation shall not be alienated, nor shall any real estate be purchased except with the consent of a majority of all the Directors.

ARTICLE IX.

These By-laws may be altered or amended at any meeting of the Corporation by a vote of two thirds of the members present at such meeting.

DIRECTORS' REPORT

DECEMBER, 1920-1921

(From motives of economy, no report was published in 1920, but those of 1920 and 1921 are combined)

FEBRUARY 9, 1921, marked the thirtieth anniversary of the opening of the Sanatorium. It seems eminently fitting, therefore, to present a brief résumé to the public of what has been accomplished during these years.

Begun as an experiment thirty years ago, when the idea of attempting to treat and cure pulmonary tuberculosis without sending patients far from home and to mountainous regions was regarded as almost chimerical, it was not long before it was proved beyond doubt that much more could be done than had been thought possible in a climate like that of New England, at a low altitude and not far from the sea. The influence of this experiment can perhaps best be stated by quoting the words of Philip P. Jacobs, Ph.D., the Assistant Secretary of the National Tuberculosis Association, in his paper prepared for the International Tuberculosis Conference held in Paris in October, 1920, and printed in *The Journal of the Outdoor Life* in November of this year. After speaking of the establishment in 1884 of the Adirondack Sanatorium by the great physician, Dr. Edward L. Trudeau, to whom more than to any other American we owe our knowledge of the treatment of tuberculosis, he says: “. . . The Sharon Sanatorium, established in 1891, was the first demonstration that tuberculosis could be cured in *any* climate. . . .” He then speaks of the Loomis Sanatorium, at Liberty, N. Y., opened in 1896, of the White Haven Sanatorium in Pennsylvania, opened in 1901, the Agnes

Memorial in Denver, and the Gaylord Farm Sanatorium in Connecticut, opened in 1904, as fruits of the work at Saranac Lake and at Sharon. He finally alludes to the establishment by the Massachusetts Legislature of the first State sanatorium at Rutland, Massachusetts, in 1898. The original purpose of the projectors of this institution was to erect a hospital for the consumptive poor, but owing to the active interest of one of the trustees — Dr. Alfred Worcester, of Waltham, who had been closely watching and impressed by the work at Sharon — it was unanimously decided by the trustees, as mentioned in their preliminary report, to change the character of the institution and to make it a sanatorium for the treatment of early cases of tuberculosis, instead of a lazaretto, as it were, for the hopelessly ill. Dr. Jacobs then adds: “ . . . The significance of this step, in view of the present emphasis upon public responsibility for institutional care, can hardly be overestimated. . . . ”

Readers of the last Annual Report (1919) will remember also the letter of Mrs. Edward C. Post, of Newport, R. I., who established the sanatorium at Morlaix in France, and her statement that it was the knowledge of the work at Sharon that encouraged her in the successful establishment of a similar institution in northern France, the inclement winter climate of which had always been regarded as most unfavorable for tuberculosis. These gratifying tributes to what has been accomplished at Sharon are strengthened by the answers recently received to a “questionnaire” sent out to all the patients who have been at Sharon during the past thirty years. These replies are now being collected and tabulated as a scientific attempt to prove the worth of sanatorium treatment in the great anti-tuberculosis movement. The final results will in time be placed on record. Sufficient evidence has already been obtained, however,

to show the great value of sanatorium treatment when properly carried out, as an important factor not only in the cure but in the prevention of disease.

Incidentally it will be well at this point to quote from a few of the replies to the "questionnaire."

"I have eight children, four boys and four girls: two girls aged twenty-four and twenty, respectively; two boys aged nineteen and seventeen, respectively; two girls aged thirteen and fifteen, respectively; two boys aged six and ten, respectively. All the children are strong and robust and have enjoyed the best of health since birth. I shall always be grateful to Sharon Sanatorium for restoring me to health and happiness (twenty-eight years ago). I weigh about two hundred and thirty pounds."

"I am glad to inform you that I am in good physical condition. I think you will agree that I must be pretty well to be able to manage a school of nearly two hundred and seventy-five pupils and run my own home at the same time, doing every bit of the housework myself. . . . I have never regretted my stay at the Sanatorium (fifteen years ago), for the rest and outdoor living were just what I needed at that time and I have felt the better for them ever since."

The mother of a boy who was suffering from tuberculous glands in the neck, accompanied by great weakness and loss of flesh, and who after a stay of several months under treatment, left looking robust and well, writes as follows:

"I am very glad to express my sincere appreciation of the great benefit derived by my son at the Preventorium at Sharon. The treatment there effected what I believe to be a positive cure of his incipient tuberculosis. It seems to me to be a wonderful thing that we can have so fine a place for children near Boston for those who are too young to be far away from home."

Recommendations have also been received from physicians of high standing who have sent delicate children to the Sanatorium for treatment and instruction.

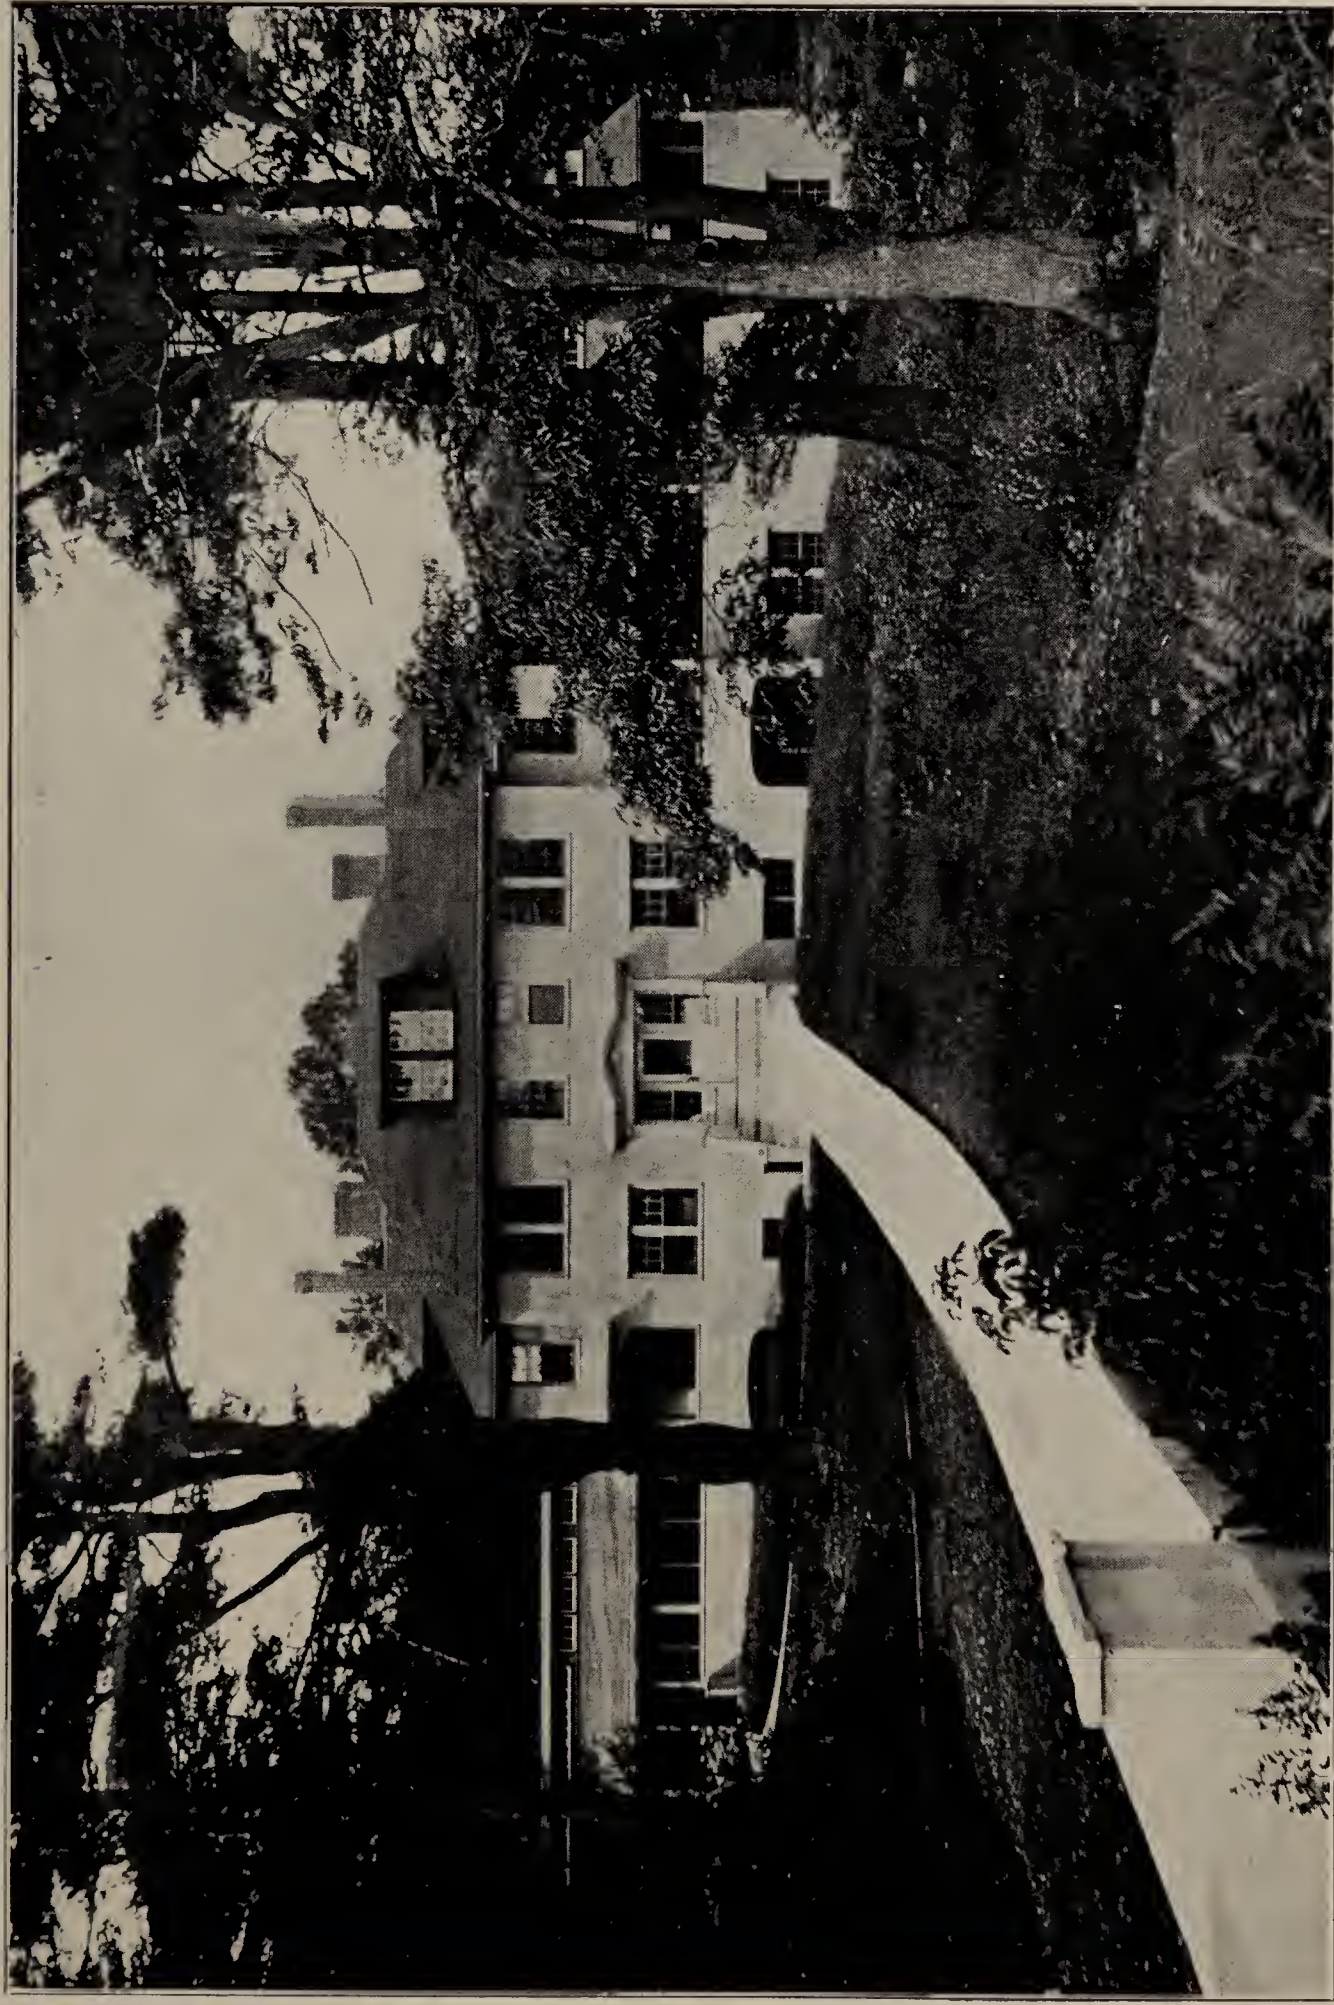

Such results as these, which are not exceptional, should surely give a sense of deep satisfaction to those who have generously aided us in our work during the past thirty years. It would seem, too, as if the knowledge of what has been accomplished in the past would act as an inspiration and incentive to many others to give aid now and in the future.

The Children's Pavilion, or Preventorium, established about three years ago, with its special feature of the open-air school, is steadily but surely becoming known among the profession, and its efficacy in taking care of delicate, tuberculous children is being daily demonstrated. The teachers thus far have been graduates from the Women's Department who are desirous of keeping up the same healthful methods of life to which they have become accustomed, while at the same time they are enabled to again take up work for which they are especially fitted. The importance of having children taught at an early age the value of such a life as is led at the Sanatorium cannot be overestimated.

Every physician who comes in contact with this disease knows the lack of proper accommodations for such people. The directors believe that, in spite of the present general stringency in financial matters, money will be forthcoming as hitherto for all undertakings which are essential to the welfare of the human race. In every direction and in every newspaper we hear and read of the necessity for meeting the tuberculosis problem by every means in our power. In this connection, it should constantly be kept in mind that in the treatment of tuberculosis we are dealing with a disease which needs months, even years, to accomplish satisfactory results. This involves a comparatively much larger outlay for the number of patients than is needed in hospitals for acute diseases which run a much shorter course. This fact should never be lost sight of in considering the comparative cost of maintenance of different institutions. The directors therefore again appeal for substantial help, which has been hitherto generously provided. They solicit

1. Contributions, both large and small, to defray the running expenses of maintenance, repairs, etc.

2. Contributions to the Endowment Fund, which now

THE CHILDREN'S PAVILION (PREVENTORIUM)

amounts to about \$50,000. It is suggested that *endowment funds* for beds in the women's department and the Children's Preventorium be given in memory of relatives or friends. The income from \$20,000 will amply supply the amount necessary for one bed. Smaller sums as endowments would be gratefully received as an aid to the same purposes.

3. A larger number of *annual subscribers*. Incidentally, a plan has been adopted to form an Alumnæ Association among former patients, some of whom have already cordially responded to this suggestion, with a view to increasing the number of those who will give money annually in varying amounts.

4. Three thousand dollars to supply a much-needed refrigerating plant.

5. Special sums for the maintenance of the X-ray Department — one of the most important features of the Sanatorium.

6. Special sums also for the maintenance of classes of instruction in basket-making, carpentry, etc., for the children and women.

SUPERINTENDENT'S REPORT FOR 1920

TO THE DIRECTORS OF THE SHARON SANATORIUM:

Ladies and Gentlemen:

THE past year has been a very trying one in many ways. Especially has it been hard and frequently impossible to keep the full quota of servants, and, in consequence, some of the routine work has been at times slighted.

Your Superintendent regrets that he has been obliged to spend so much money. One of the causes of this is, of course, the increase in wages. Fortunately we have not had to increase as much as many private families have done, and still this item has made the expense of running the institution much greater, and, in addition, the cost has mounted very much because foodstuffs have been exceedingly high in price. Mrs. Bishop has been as economical as possible and in many ways has exceeded expectations. The diet has been at all times varied and attractive, although many of the more expensive meats have been seen at more infrequent intervals than in former years. The cost has been augmented, also, a little by the fact that there have been a few more patients treated this year, since the Children's Pavilion has been better filled.

The gardens have yielded very liberally, and while they have been an item of expense, they have, nevertheless, supplied us with better vegetables than could be purchased, and a very much greater abundance has been possible than would have seemed advisable if bought in the open market. I am inclined to feel that, for these reasons, it pays to have the gardens in spite of the seemingly considerable cost of running them.

THE SUN PARLOR

THE DINING ROOM

The Children's Pavilion has been gradually filling up until now we have thirteen patients. As this department becomes better known there is no doubt but that beds will be at a premium, as they usually are in the women's department.

The Superintendent's former quarters have been occasionally used to receive private patients, and for this accommodation five dollars per day has been charged.

Very little new construction has been undertaken.

The item of repairs is large and is made so, for the most part, by the wages of the carpenter and the painter, who come each day, as well as by the higher cost of raw material, especially of paints. The Superintendent has always felt that you wished to have the buildings kept in the best of repair, and for that reason we have for the last few years employed a carpenter and a painter for most of the year. These items, doubtless, could be done away with for a short period, but sooner or later the repairs would have to be undertaken on an extensive scale, so that it is to be doubted whether anything would be saved in the end, especially since the wages of the men we employ are much less than the wages of ordinary journeymen mechanics.

The woods have lost most of their beauty because of the extensive cuttings that have been made this year in an effort to exterminate the gypsy moth. It is hoped, however, that the lumber, which has been under the charge of the State Department of Forestry, will later bring us a good profit in accordance with the estimates made by that Department. In the course of time we trust the forest will grow up again to be the same delightful addition to the Sanatorium environment that it has been in the past.

(Signed) WALTER A. GRIFFIN,
Superintendent.

MEDICAL REPORT FOR 1920

Full capacity of Sanatorium (including Children's Pavilion) .	45
Number of patients admitted since December, 1919	60
Number of patients discharged during the year	61

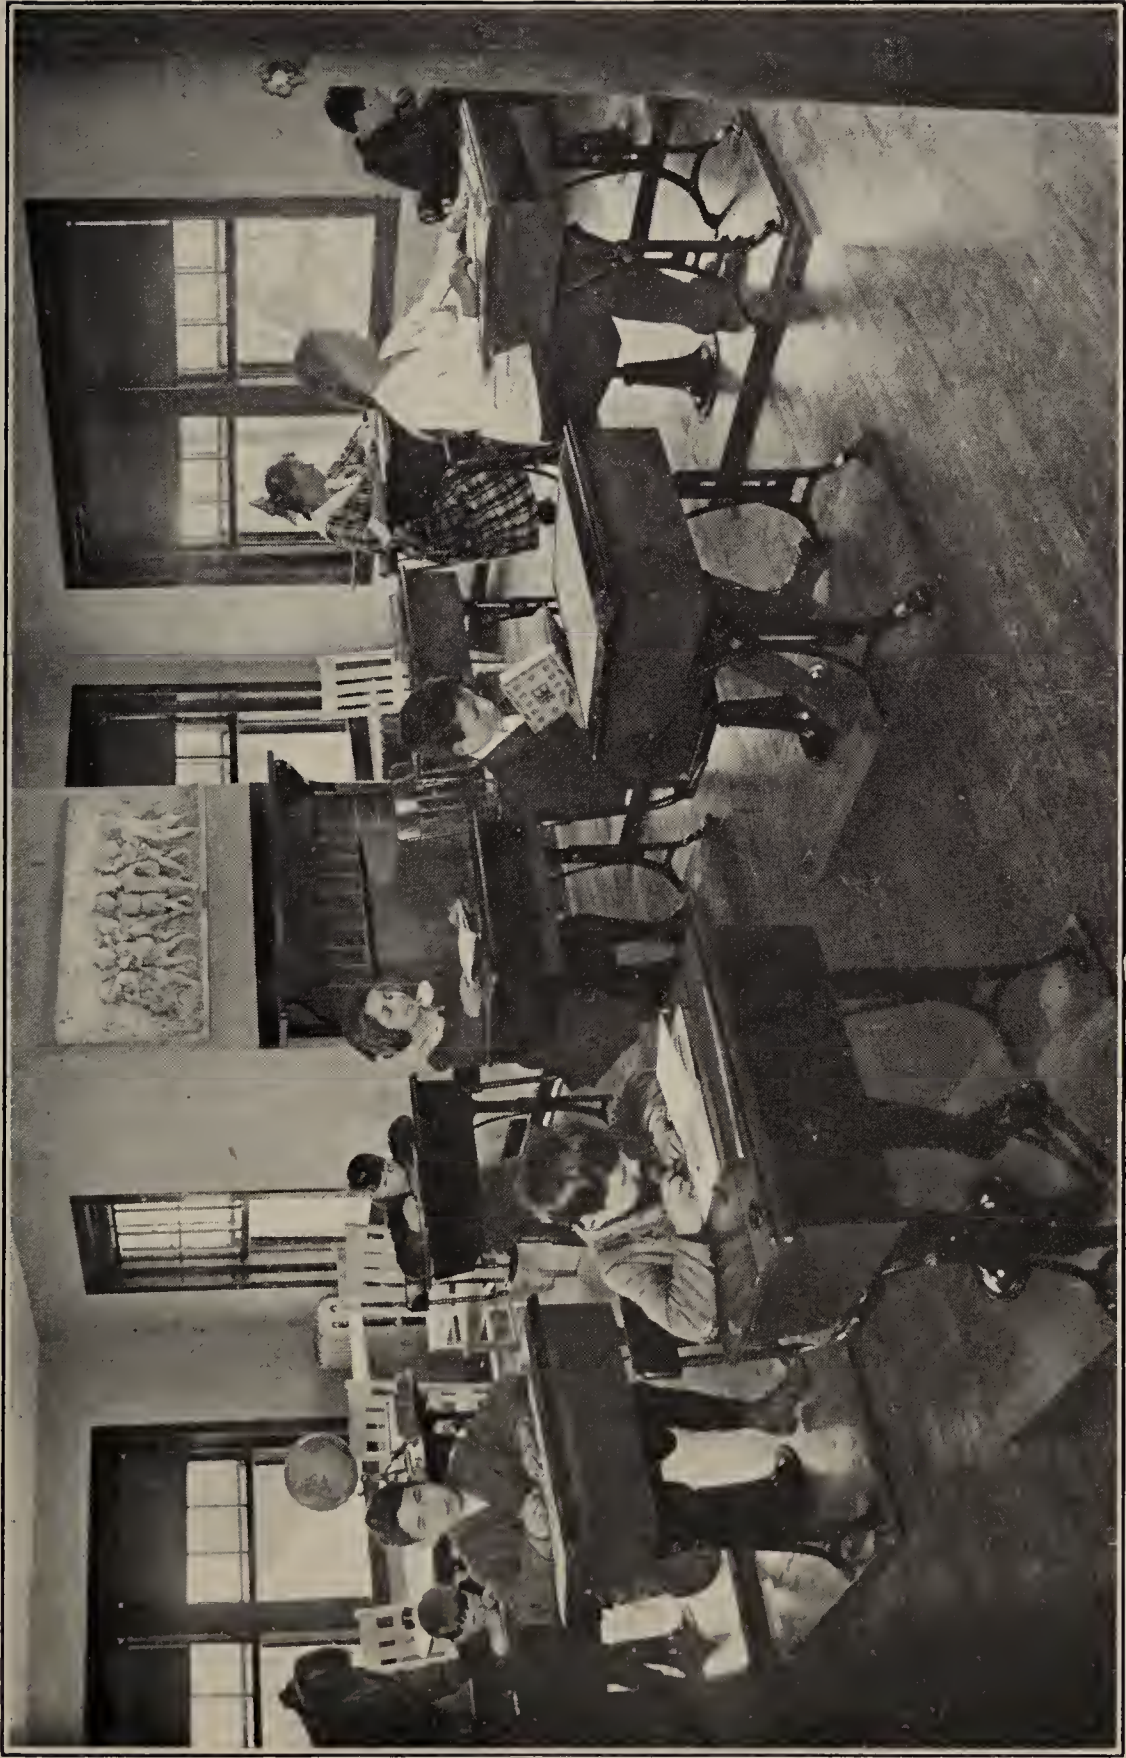

OF those discharged during the year two stayed less than one month, five did not react to a full dose of tuberculin, one was convalescent from empyema, one had bronchitis and asthma, one had bronchitis, and one had pulmonary abscess. This leaves fifty to be considered in detail.

RESULTS DURING THE YEAR

Arrested	20	=40%
Apparently arrested	11	=22%
Quiescent	7	=14%
Improved	7	=14%
Unimproved	4	=8%
Died	1	=2%
	50	

The number of patients who had tubercle bacilli in sputa was .	25
The number of patients who had a positive tuberculin reaction was	17
The number of patients in whom the physical signs were deemed sufficient for diagnosis was (1033, 1041, 1061, 1069, 1070, 1079, 1085, 1103)	8
The number of patients who had hemoptysis before entrance or during stay was	22
Average stay of all cases	8.6 months
Longest stay of any case	24.5 months
Shortest stay of any case	1 month
Average gain in weight of all cases	11 pounds
Number of cases who lost weight	6
Average age of all cases	20.6 years
Number of hospital days	12,929
Number of hospital days that patients were confined to bed	2,316
Number of meals served in bed	6,287

The medical staff wish to add their testimony to that of the Directors in emphasizing the important part that the Sanatorium plays not only in Massachusetts but

SCHOOLROOM, CHILDREN'S PAVILION (PREVENTORIUM)

throughout New England, and even beyond, in reaching a certain class of patients for whom there is little or no provision. We are frequently obliged to turn away applicants for admission simply from lack of sufficient accommodations. The staff feel that it is of the greatest importance that the work should continue indefinitely if possible under the same conditions as at present.

Although the Children's Department is not yet known among the medical profession as it should be, constant efforts in many directions are being made to spread the knowledge of what can be done there for delicate and tuberculous children. The favorable results thus far are very striking.

During the autumn of 1920 a meeting was held by members of the Norfolk District of the Massachusetts Medical Society at the Sanatorium. About eighty physicians were present. Addresses were made by the medical director, the consulting physician of the Children's Department, and a demonstration of the operation of artificial pneumothorax was given by the Superintendent. Every one present seemed to be greatly impressed with the cheerful atmosphere of the Sanatorium and the favorable results of treatment as demonstrated.

Instruction to students of the Harvard Post-Graduate Medical School was given during the year by the Superintendent, the medical men expressing themselves enthusiastically over their experience in this course.

The medical staff feel, therefore, in consideration of all these facts, that it is of vital importance that the work should not only continue, but grow. They trust that every effort to that end may be made.

(Signed)

VINCENT Y. BOWDITCH,
Medical Director.

WALTER A. GRIFFIN,
Superintendent.

MEDICAL REPORT FOR 1921

Full capacity of Sanatorium (including Children's Pavilion)	45
Number of patients admitted since December, 1920	62
Number of patients discharged during the year	65

OF those discharged during the year five stayed less than one month, one did not react to a full dose of tuberculin, three had bronchitis, one lupus vulgaris, one was convalescent from abscess of lung, two others had post-pneumonic and post-influenza condition, one had probable carcinoma of lung, and two of the children enlarged tonsils. This leaves forty-nine to be considered in detail.

RESULTS DURING THE YEAR

Arrested	11	=22%
Apparently arrested	15	=31%
Quiescent	9	=18%
Improved	13	=27%
Died	1	= 2%

49

The number of patients who had tubercle bacilli in sputa was	12
The number of patients who had a positive tuberculin reaction was	21
The number of patients in whom the physical signs were deemed sufficient for diagnosis was (1092, 1105, 1118, 1120, 1130, 1136, 1140, 1160, 1162, 1169, 1172, 1173, 1180, 1181, 1188, 1190)	16
The number of patients who had hemoptysis before entrance or during stay was	16
Average stay of all cases	5 months
Longest stay of any case	26 months
Shortest stay of any case	1 month
Average gain in weight of all cases	11.5 pounds
Number of cases who lost weight	None
Average age of all cases	28 years
Number of hospital days	12,951
Number of hospital days that patients were confined to bed	2,429
Number of meals served in bed	6,865

TO THE AUDITING COMMITTEE OF THE SHARON SANATORIUM

Mr. INGERSOLL BOWDITCH

Rev. E. F. MERRIAM

Boston, Massachusetts:

Gentlemen: We have examined the accounts of the Treasurer and of the Superintendent of the Sharon Sanatorium for the years ended November 30, 1920, and November 30, 1921. We have found the Treasurer's Report to be correct and the Cash and Securities to agree with the books and the Treasurer's Report.

Any further information that you may desire we shall be glad to supply.

Respectfully submitted,

MORGAN & MORGAN.

PLAY ROOM, CHILDREN'S PAVILION
